TITLE : VEHICLE REARWARD CHECKING
DEVICE

ABSTRACT : PURPOSE: To prevent the incidence of disturbed light into a camera part, and provide an excellent image of the vehicle rear ward with less dead angle or distortion by mounting the camera part which is incorporated by the specified space ahead of the rear end part of a rear spoiler and obtains the image of the part which is diagonally downward at the rear of the vehicle from the rear surface of the rear spoiler.

CONSTITUTION: A camera part 12 is incorporated by the specified space ahead of the rear end part 11a of a rear spoiler 11. Thus, the rear end part 11a of the rear spoiler 11 forms the eave and the incidence of the disturbed light into the camera part is prevented. In addition, this camera part 12 is mounted so that the image of the part which is diagonally downward of a vehicle 10 may be obtained from the rear surface of the rear spoiler 11. As a result, a rear obstacle which is close to the vehicle 10 can be photographed and displayed on a display part 13 without using a super wide angle lens.
